 Address: P.O. Box 683
 City: Saint Cloud State: MN Zip: 56302
 Phone Number: 320.223.9466
 Alternative Phone: _____

Please indicate, with a check, each of the following that apply:

- Current STRIDE Academy Teacher Current STRIDE Academy Parent
 Currently on STRIDE's Board Have Previous School Board Experience

1. Why would you like to serve on the STRIDE Board of Directors?

What an amazing opportunity to make an impact on + advocate
for the most incredible beings on Earth. Children are remarkable
+ deserve individuals who cheer on their differences, celebrate their
achievements, support their ideas, + be a voice for them in the adult
World. I would love to have the chance to work for these young people --

2. What experience and specific area/s of expertise would you bring to the board?

I am currently an administrative assistant in the education
Department at CentraCare, I have completed some secondary
education majoring in Biomedical Science, minoring in math,
some minor marketing experience (flyer + brochure event creation + prep),

3. What are the primary issues you think need to be addressed by the board over the next two years?

STRIDE does so well in offering extra-curricular
opportunities to the students. I would love to discuss
ways to incorporate the arts into every subject. (cont.)

over —

1. inspire creativity, spark passions, & watch them change the world!

2. I have experience in handling money, balancing accounts, ordering supplies for departments, I have high attention to detail, a passion for research, a love for humanity & I specialize in empathy.

3. Children learn best when they are engaged. Studies have shown that finding ways to incorporate art into all subjects not only boosted learning, but also increased the mood, morale, & performance of the teachers! A study conducted in 2002 & updated in 2010, found that students who received more arts education did better on standardized tests, improved their social skills & were more motivated!

Proof that not only can arts education help close socioeconomic gaps, but many other reports show that it helps improve fluid IQ scores, graduation rates & can demonstrate an increased proficiency in math & communication. With the added benefits of greater job satisfaction from educators -- it is a win-win & definitely something to look into!
